# Kikugawa City Waste Guide

## ATTENTION!

- Place in bags designated by the city, and fasten tightly. (Non-designated bags will not be collected)
- Write your full name and the name of your resident's association on the designated bag.
- Be sure to check your waste calendar and throw away your trash at your designated area by 8AM of the trash pick-up day or Please bring it directly to the Environmental Resources Gallery.
- Please bring any waste that doesn't fit in the city approved waste bags directly to the Environmental Resources Gallery.
- Business garbage cannot be sent to the residents' association garbage collection point.

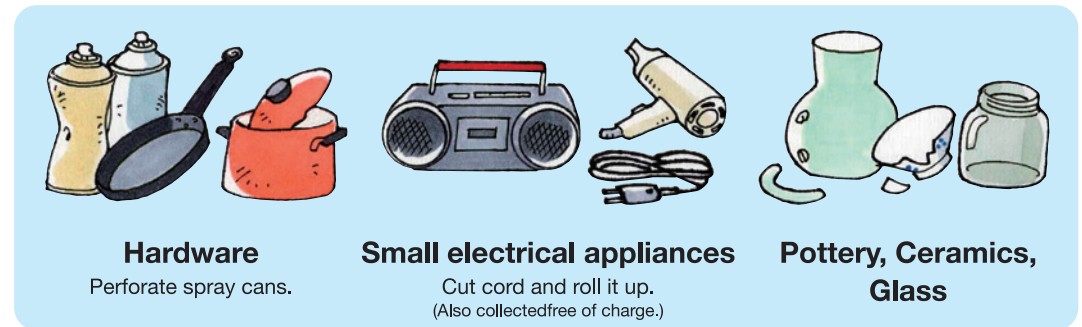

## Disposing of combustible waste

- Throw away kitchen waste after draining it of all water.
- Remove waste before throwing away diapers.
- Wipe off cooking oil or lotion as much as possible before disposing of burnable waste.
- Always cut long, easily tangled objects such as rubber hoses, ropes, and fishing lines to 1.0 m or shorter.

## Disposing of Non-combustible waste

- Cut cords of appliances and such from the base and roll them up before throwing them away.
- Roll up wires and metal hangers before throwing them away.
- To prevent fires during collection, only throw away spray cans after using them up completely and perforating them in a well-ventilated area. Throw away lighters only after using up all the gas.
- Wrap sharp objects such as blades or broken glass in a plastic bag or such before throwing them out.
- Remove the lithium-ion battery.

## Recyclable Items

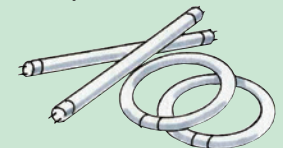

### Dry cell, Rechargeable dry cell

- Dry cell and rechargeable batteries will be collected on non-combustible waste days.
- Be sure to place only batteries in the collection boxes located at the pick-up areas.

### Fluorescent lights, Thermometers (Mercury containing)

- Pick-ups will be twice a year (Refer to waste calendar)
- Kikugawa City Hall will notify residents of collection dates, times, places, and methods. [Attention]
- Do not break fluorescent lights or thermometers when disposing of them.
- Put broken light bulbs in the non-combustible waste.
- Fluorescent bulbs are also OK.

## Plastic Containers and Packaging (Recyclable plastic)

「Container」 means...Something that a product is put inside (Covers a bag)  
 「Wrapper」 means...Something that becomes unnecessary once it is detached from the product, when the product is consumed, etc.

Product wrappers and Grocery bags.

Laundry detergent, Shampoo and Lotion containers.

Plastic caps and Lids.

Egg containers and Yogurt cups.

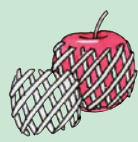

Items with this mark are recyclable plastic.

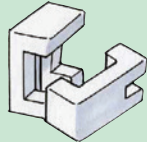

Frozen food bags and Candy wrappers.

Seasoning and Beverage containers.

Styrofoam netting.

Styrofoam packaging from home appliances.

Colored trays.

Instant ramen cups and bento boxes.

## Rules

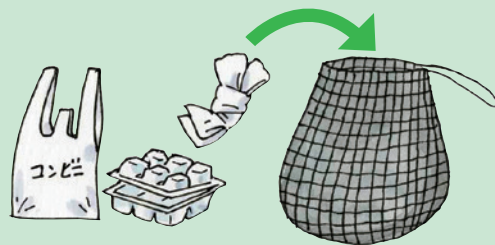

### At home

- Please do not leave any leftover food or product.
- Wipe off or lightly rinse off anything stuck.
- It is OK if there are paper stickers attached.

### When taking out

- Remove contents from the bag, separate them, and place them in nets.
- Fasten bags tightly before disposing of them.

## Commonly mistaken items

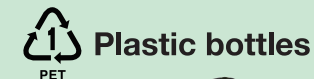

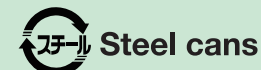

Please throw away in the city waste bag on waste pick-up days

### Items not used for packaging

Plastic (Goods itself plastics) CDs, DVDs (their cases)  
 Toothbrushes, Hairbrushes,  
 Plastic Products Clothespins (plastic), hangers (plastic)

### Items with dirt on the inside cannot be taken

Tubes for toothpaste,  
 Condiments, etc.

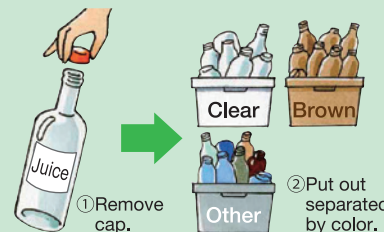

## ※ Please empty all spray and paint cans and throw away on non-combustible waste days

- Rusted or corroded items cannot be recycled. Please put them in the non-combustible waste.
- Please separate all aluminum and steel cans.
- Please do not crush cans or PET bottles that will go in city recycling.
- Dispose of plastic lids and PET bottle labels as plastic recycling.
- Please clean inside before disposal.
- Bottles with leftover drinks or garbage such as cigarette butts inside cannot be recycled.
- Dispose of items that cannot be cleaned as combustible waste.

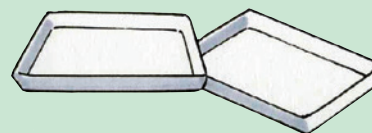

## Glass bottles

- All bottles will be separated by color into clear, brown, and other.
- Clean insides thoroughly before recycling.
- Bottles with leftover drinks or garbage such as cigarette butts inside cannot be recycled.
- Dispose of ceramics, glass dishes, cups, and heat-resistant containers as non-combustible waste.
- Bottles can be recycled even if they are broken.
- Empty bottles of pesticides or flammable liquid will not be received. (Inquire at the original place of purchase or outlets for hard to process items.)

## Styrofoam trays (white only)

- Rinse and dry before throwing away.
- Remove all stickers, label, etc.
- Natto containers go with the plastic containers and wrappers.

## Permanent collection base for recyclables (Akatsuchi Recyclestation)

Will take recyclable items for free that did not get to be put out on collection day.

6. How to dispose of small electronics

Place small electronics in the container installed inside the facility.

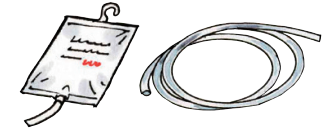

7. Warnings

This excludes items covered by the Home Appliance Recycling Law. (see P6)  
 Items produced by commercial activities are not accepted.

## Disposal of waste from home medical care

Please beware of special methods for disposing of waste produced by at-home medical treatment.

- Injection needles, tubes with needles, etc. used at home should be returned to the relevant medical agency or pharmacy. (The city cannot handle them.)
- Syringe barrels without needles, tubes, catheters, IV/nutrient packs, gauze, rubber or plastic gloves, etc. should be placed in a transparent bag, and put in the city approved waste bag for combustible waste.
- Please inquire with a medical institution or the City Hall Environmental Promotion Division for how to dispose of other waste produced by at-home medical treatment.

## Door-to-door collection of bulky waste

Please contact the following businesses for collection of oversized waste that you cannot bring yourself.

1. Collectors Enshu Un'yu Co., Ltd. 2. Address 996-3 Nakauchida  
 3. Tel 0537-36-1811 4. Open hours Monday~Saturday 9:00~17:30  
 5. Warning ※ For consultation on rates and reservations, please contact the above company.

## Disposal of pruned branches

Kikugawa City has businesses that will turn vegetation into chips which will be composted. To advance recycling and reduce waste, please bring domestic branches or grass to the businesses below.

### KOBAYASHI SEIZAIJO

Address 4590 Nakauchida, Kikugawa Tel 0537-36-3570

Items that can be carried in Trees, branches, bamboo, small loads of grass (2 fertilizer bags worth)

Hours Monday~Saturday 8:00~12:00 13:00~17:00

※NOTE: Please check in advance regarding Saturday working days.

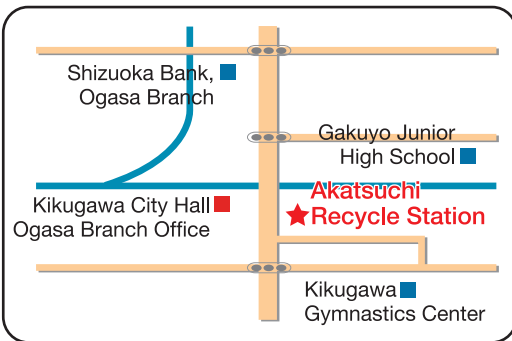

Closed Sundays, national holidays, and New Year's Day.

Items that cannot be carried in  
 · Large loads of grass · Tree and bamboo stumps  
 · Plywood · Withered trees or grass  
 · Building materials from a demolished house and other industrial waste

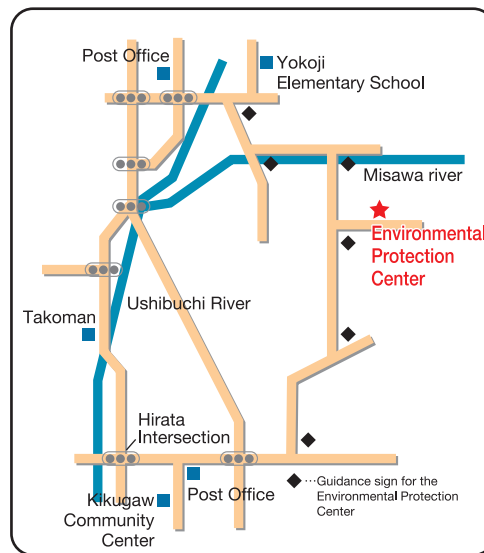

- ※ Please remove any objects other than vegetation (e.g. plastic, sand, gravel, metal), as they get in the way of processing. For details about bringing in material, please ask the businesses above.
- ※ Cut long branches into 1.5m - 2m pieces and bind them with string.
